

Production Backlog

Priority	Estimate	Sprint	User Type	Story
1	Small	1	Official	I want the OPL and IRV algorithms to work fully
2	Medium	1	Official	I want invalidated ballots to be removed from the IRV election when run by the software system with a file created to store invalid ballots. At least half of candidates need to be ranked for a ballot to be valid.
3	Large	1	Official	I want to see a table of how the election progressed each round during an IRV election. Table will be displayed to the screen with important information
4	Small	1	Official	I want to input a file as a command line argument when running election
5	Small	1	Official	I want a text prompt for input file to show if no command line arguments are given.
6	Large	1/2	Official	I want a GUI to input the file. A window should appear for user to type in file.
7	Small	2	Official	I want the software to handle upwards of 10000 ballots
8	Medium	2	Official	I want a short report file to be created that has the date, type of election the candidates, the number of seats, winners, and any other pertinent
9	Large	2	Official	I want to be able to have ballot inputs on the screen directly to the program. There should be a nice GUI to input ballots with a way to tell what kind
